

DIABLO® RANGE

Smoke extraction unit F400-120
Air flow from 300 to 35 000 m³/hr
under pressures of 50 to 700 Pa.
in compliance with NF EN 12101-3

Diablo®

Diablo twin®

DIABLO®

Certificate number
0679 - CPR - 0949

DIABLO TWIN®

APPLICATION

- Smoke extraction units meeting legislative requirements for the extraction of smoke and hot gases in the event of fire in high rise buildings and public assembly buildings.
- Range also designed for the extraction of contaminated air from industrial premises, professional kitchens and car parks, etc.
- ❖ The DIABLO®, DIABLO TWIN® program is F400-120 approved by the CSTB and covered by the CE certificate for smoke and heat extractor fans in compliance with standard NF EN 12101-3.

RANGE

- Available in 3 sizes and 10 models, the DIABLO® version covers air flow s from 300 to 18000 m³/h under pressures from 50 to 700 Pa. The DIABLO TWIN® version, made up of 2 motorized fan units, provides air flow s of 300 to 35 000 m³/h.

CONSTITUTION

- Aluminium supporting frame reinforced by a galvanized chassis for DIABLO TWIN® 630 to 800.
- ❖ Removable and interchangeable panels in 10/10 RAL7035 pre-lacquered galvanized metal sheet.
- Set of feet for fixing to the floor.
- ❖ Wide access for the cleaning and maintenance of the fan with the installation configuration.
- Motor fan support consisting of a galvanised steel plate strengthened by raised edges.
- Galvanised steel reaction impeller (high performance and easy to clean), statically balanced, fitted with an aluminium hub a directly coupled to the motor.
- Motor: B3 motor, protection IP 55 class F
 - 230V, 50Hz Single-phase motor with permanent condenser.
 - 1 speed 230/400V 50 Hz three-phase motor.
 - 2-speed, 400V 50Hz three-phase motor, Dahlander winding (4/8 and 6/12P), independent windings (4/6 and 6/8P).

INSTALLATION

- ❖ The DIABLO® range can be installed in all positions. The lateral panels in RAL7035 pre-lacquered galvanized metal sheet are interchangeable and thus enable the unit to be connected in numerous installation configurations: in line, intake on the left and discharge at 90° to the right and/or left, intake above outlet to the left and/or right, etc.

Can be used indoors or outdoors (see installation options).

VARIANTS F400-120 APPROVED BY THE CSTB

- Acoustic insulation in very high density 25 mm 120 kg/m³ mineral wool providing powerful acoustic attenuation (DIP option).
- Double skin insulation (DDP), standard external face in 10/10 RAL7035 galvanized sheet, internal face in 10/10 galvanized sheet and insulation in high density mineral wool, 25 mm - 60 kg/m³. Recommended for installations requiring regular maintenance of the unit while providing attenuation of the sound levels radiated (professional kitchens, etc.).
- Condensate tray at bottom of unit (DEC option) for removal of condensates.

OPTIONS

- ❖ Numerous installations, operating, control and regulation are available and approved F400-120 by the CSTB.

The SINGLE PHASE versions are not F400-120 approved - they are for comfort use.

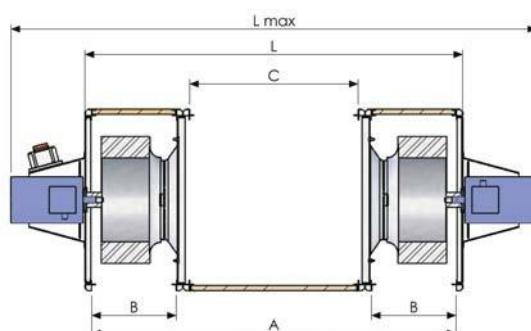

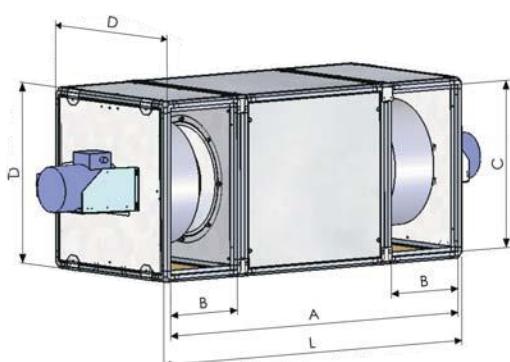

For the DIABLO TWIN® version, double the above electrical data. Speed regulation may be provided, factory-prewired on the motor support in both VFM and VFT versions (see page 261). For the DIABLO TWIN® unit, it is possible to opt for 1 speed controller common to both motors. For a comfort/smoke extraction application slaved to a relay unit, only the VFT speed controller is compatible. This factory-wired and -fitted configuration is F400-120 / NF EN 12101-3 approved by the CSTB.

EXCLUSIVE CONFIGURATIONS F400-120 / NF EN 12101-3

DIABLO®

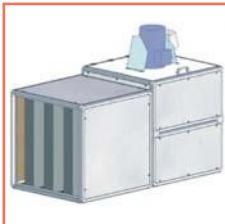

PADLOCKABLE LOCAL SWITCH

Installed as standard over the whole range.

FACTORY WIRED ASSEMBLY, RELAY UNIT Ref. CDF® AND SPEED CONTROLLER Ref. VFT

Separate or combined, these factory-fitted configurations are F400-120 / NF EN12101-3 approved by the CSTB. Only the VFTspeedcontroller (three-phase input/output) is compatible with this certification in comfort/smoke extraction applications.

BAFFLE SILENCER KIT ref. KSB

Designed to be directly linked with the DIABLO® or DIABLO TWIN® housing, to the intake or to the expulsion. Plan a loss of load of 30 Pa.

KSB Model	Dimensions I x L x H (mm)	Weight (kg)	Attenuation dB(A) INTAKE	Attenuation dB(A) OUTLET
280 - 400	620 x 620 x 620	26	PSA-7	PSA-6
450 - 560	811 x 811 x 811	48	PSA-8	PSA-7
630 - 800	1101 x 1101 x 1101	74	PSA-10	PSA-9

ACOUSTIC CHARACTERISTICS

DIABLO®

- The NSC3 dB(A) values () shown in the curves relate to the sound level at 3 m in free field for the unit connected at the intake and discharge by a duct with the same acoustic insulation as that of the unit.
- To obtain the acoustic power spectrum at the intake of the unit connected in dB(A) gain, take the sound power (PSA) shown on the curves () and the apply the correction factors in the table below depending on the unit model and its motor drive.

Unit model	Motor	ACOUSTIC SPECTRUM WEIGHTING							
		63	125	250	500	1000	2000	4000	8000
DIABLO® - DIABLO TWIN® 280	B4	-2	-2	-1	-1	-5	-10	-13	-20
DIABLO® - DIABLO TWIN® 280	A6	1	2	1	-1	-6	-10	-15	-23
DIABLO® - DIABLO TWIN® 315	B4	-3	-2	-1	0	-8	-10	-14	-22
DIABLO® - DIABLO TWIN® 315	A6	0	2	0	1	-9	-11	-16	-24
DIABLO® - DIABLO TWIN® 355	B4	2	1	1	-2	-5	-10	-13	-19
DIABLO® - DIABLO TWIN® 355	A6	5	5	2	-2	-6	-11	-15	-22
DIABLO® - DIABLO TWIN® 400	B4	1	0	0	-2	-5	-9	-12	-17
DIABLO® - DIABLO TWIN® 400	A6	4	4	2	-2	-6	-10	-14	-19
DIABLO® - DIABLO TWIN® 450	D4	-1	-1	-1	-1	-6	-9	-15	-19
DIABLO® - DIABLO TWIN® 450	B6	3	4	0	-1	-6	-9	-16	-22
DIABLO® - DIABLO TWIN® 500	F4	-3	-2	2	-3	-5	-10	-15	-20
DIABLO® - DIABLO TWIN® 500	B6	6	6	3	-4	-6	-11	-16	-24
DIABLO® - DIABLO TWIN® 560	G4	4	4	-1	-2	-7	-9	-11	-13
DIABLO® - DIABLO TWIN® 560	D6	8	9	0	-2	-7	-11	-12	-15
DIABLO® - DIABLO TWIN® 630	F6	8	4	0	-1	-7	-10	-15	-18
DIABLO® - DIABLO TWIN® 710	G6	3	0	0	-1	-6	-10	-13	-17
DIABLO® - DIABLO TWIN® 800	I6	0	6	2	-2	-6	-11	-15	-21

- If the DIABLO® or DIABLO TWIN® units have type DIP or DDP construction variants, add the attenuations shown below.

Unit model	Motor	Attenuation for DIP versions (acoustic insulation) and DDP (double-skin finish)							
		63	125	250	500	1000	2000	4000	8000
DIABLO® - DIABLO TWIN®	DIP	0	-1	-2	-4	-4	-6	-6	-6
	DDP	0	0	-1	-2	-3	-3	-2	-2

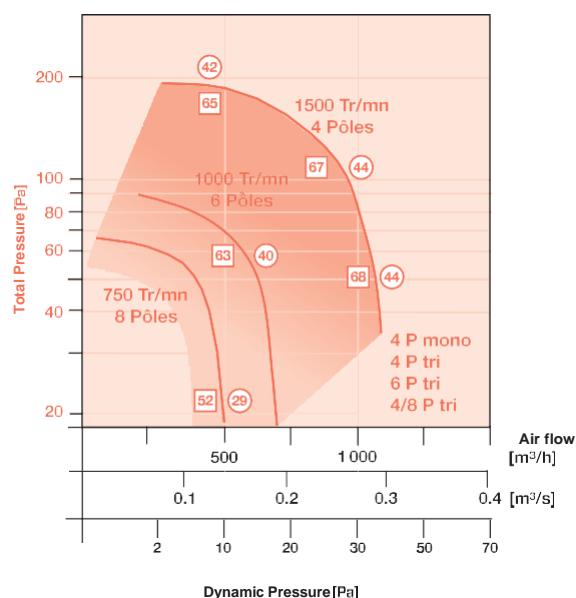

- To define the sound pressure level in free field at a certain distance, device on the floor, discharge free, unit connected upstream, subtract the values from the table below from the sound power level PSA () shown in the curves.

Distance (m)	1,5	3	4	5	7	10
Attenuation (dB)	11	17	20	22	25	28

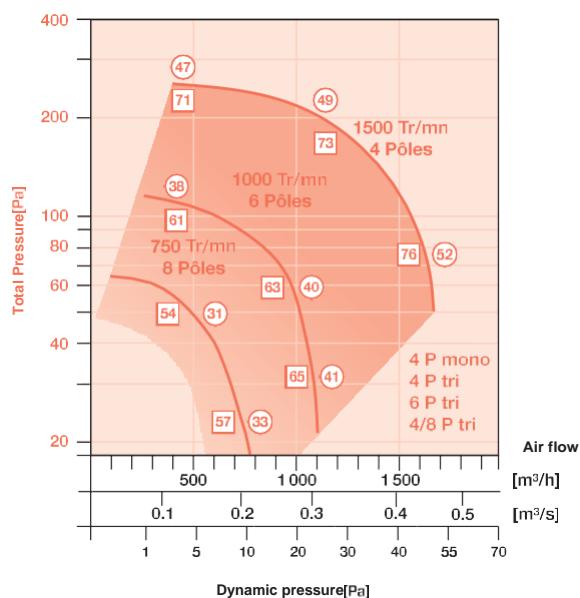

Nota: Attenuations given for standard unit. For versions fitted with DIP and DDP options, also subtract the corresponding PSA () attenuations (see pages 262 and 263).

DIABLO TWIN®

REMOVAL OF CONDENSATES ref. DEC

Located at the bottom of the unit, this condensate tray allows the DIABLO® or DIABLO TWIN® unit to be used where there are special operational constraints, particularly in professional kitchens, etc. Includes the PCB option.

ACOUSTIC INSULATION ref. DIP

Very high density 25 mm - 120 kg/m³ mineral wool providing powerful acoustic attenuation p261. Option F400-120 / NF EN12101-3 approved by the CSTB.

DOUBLE SKIN INSULATION ref. DDP

Insulation in 25mm - 60 kg/m³ high density mineral wool. Internal face in 10/10 galvanized metal sheet. External surface in 10/10 galvanized metal sheet, RAL7035 pre-lacquered. Meets the requirements of installations requiring regular maintenance of the unit and a significant reduction in radiated sound levels. Option F400-120 / NF EN12101-3 approved by the CSTB.

DIABLO® EXTERIOR KIT REF. KED

This kit includes a motor cover, bird-resistant mesh on the intake and a rain shutter on discharge.

⇒ This rainshutter includes the non-return function.

DIABLO TWIN® EXTERIOR KIT ref. KED — TWIN

This kit has two motor covers, two cowls with mesh on the outlet and a hood.

DIFFERENTIAL PRESSURE SWITCH ref. DEP

Function: to detect a ventilation fault.

⇒ Factory-fitting to DIABLO® or DIABLO TWIN® F400-120 / NF EN 12101-3 approved.

SPEED CONTROLLER ref. VFM/T

Function: regulation of fan speed by varying the power supply frequency.

VFM: 230V single phase supply and 230V three-phase output for comfort application. Not compatible for connecting via the relay unit. The VFT speed controller must be used for this.

VFT: 400V three phase supply and 400V three-phase output for comfort/smoke extraction application.

⇒ Factory fitting and wiring of the speed controller in the motor compartment of the DIABLO® unit with remote potentiometer F400-120 / NF EN 12101-3 approved.

2-SPEED SINGLE-PHASE UNIT ref. CATM

Function: controls the DIABLO® single phase turret at 2 speeds either by remote control (CATM D version) or by weekly timer (version CATM H).

• This unit can be factory-wired and fitted if required.

BAFFLE SILENCER KIT ref. KSB

Delivered with accessories for direct coupling to the DIABLO® or DIABLO TWIN® unit. This unit is weatherproof and so may be installed outdoors. Kit F400-120 / NF EN12101-3 approved by the CSTB.

SUPPORT FEET ref. PCB

Set of 4 feet for the DIABLO® range. For the DIABLO TWIN® range, set of 8 feet up to the 560 model. Beyond this, the units are fitted with a strengthened chassis as standard.

VIBRATION MOUNTS ref. PAV

Mounts selected to exactly match each unit model. Four mounts for the DIABLO® range. Six mounts for the DIABLO TWIN® 630, 710 and 800. Eight mounts for the other DIABLO TWIN® models.

FLEXIBLE SLEEVES ref. MTS — MO

Fire classification MO.

DIABLO®: Dimensions H1xC as standard, AxC if 2 intakes.

DIABLO TWIN®: Dimensions CxC at the intake and AxC at the discharge.

ELECTRICAL OPTIONS

DIABLO®

RELAY UNIT ref. CDF®

Function: the CDF® unit can be factory wired and fitted to the DIABLO® range.

⇒ Factory-fitting F400-120 / NF EN 12101-3 approved.

SELF-REGULATING CONSTANT PRESSURE UNIT ref. LOBBY®

Function: Function: adapts the fan rotation speed instantaneously to the requirements of the installation. Energy savings of 30 to 60% and a reduction of sound levels radiated by the system.

⇒ Factory wiring and fitting for LOBBY-T F400-120 / NF EN 12101-3 approved for comfort/smoke extraction application.

2-SPEED CONTROL BOX ref. CDA

Function: controls and protects two-speed motors.

DAHLANDER or SEPARATED WINDINGS, coupling with 24V local or remote control. Not compatible with the CDF unit.

• The box can be factory-fitted to the unit.
